

Keamanan Siber dan Privasi Data dalam Era Digital

- CAK2MDB2
- WAWASAN GLOBAL
TIK
- MATERI SUPLEMEN II
- DOSEN:
 - Aji Gautama Putrada

Pentingnya Keamanan Siber

Protects Sensitive
Data

Ensures Business
Continuity

Maintains Trust and
Compliance

Prevents
Cybercrime and
Threats

Protecting Sensitive Data

Use

- Use Strong Encryption

Implement

- Implement Access Controls

Update

- Regularly Update Security Systems

Educate

- Educate Users on Data Protection

Ensures Business Continuity

Develop a Cybersecurity Strategy

Implement Data Backup and Recovery Plans

Conduct Regular Security Audits

Establish Incident Response Protocols

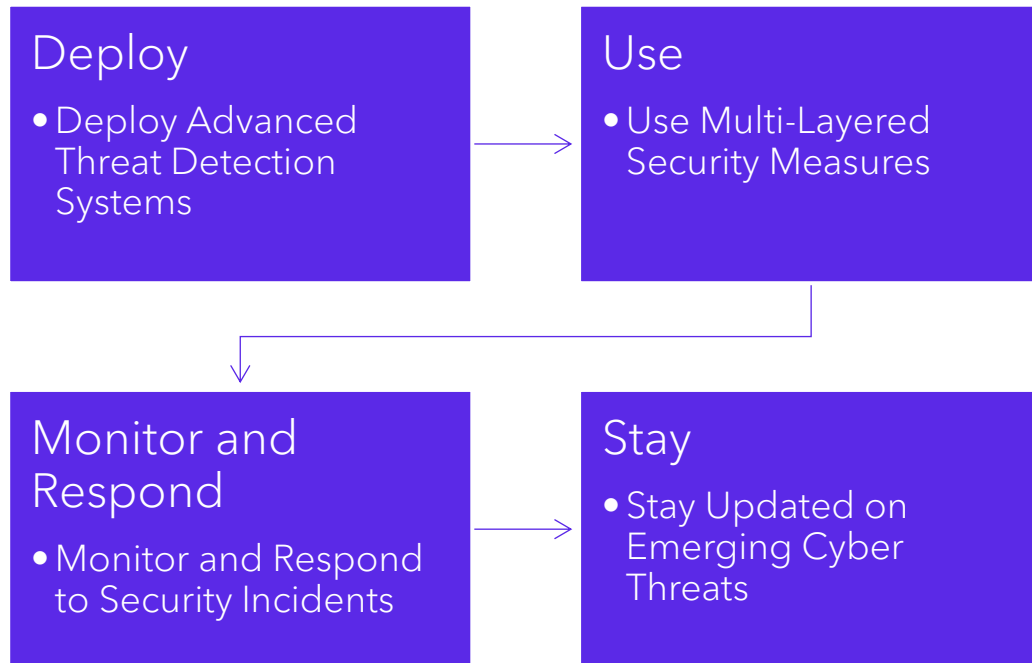

Maintains Trust and Compliance

Adhere	Adhere to Data Protection Regulations
Ensure	Ensure Transparency in Data Handling
Implement	Implement Strong Authentication Measures
Audit	Regularly Audit Security Practices

Prevent Cybercrime and Threats

CIA Triad

Confidentiality

- Data Encryption
- Access Control
- Multi-Factor Authentication (MFA)
- Data Masking & Anonymization

Integrity

- Hashing & Checksums
- Access Control & Versioning
- Digital Signatures
- Audit Logs & Monitoring

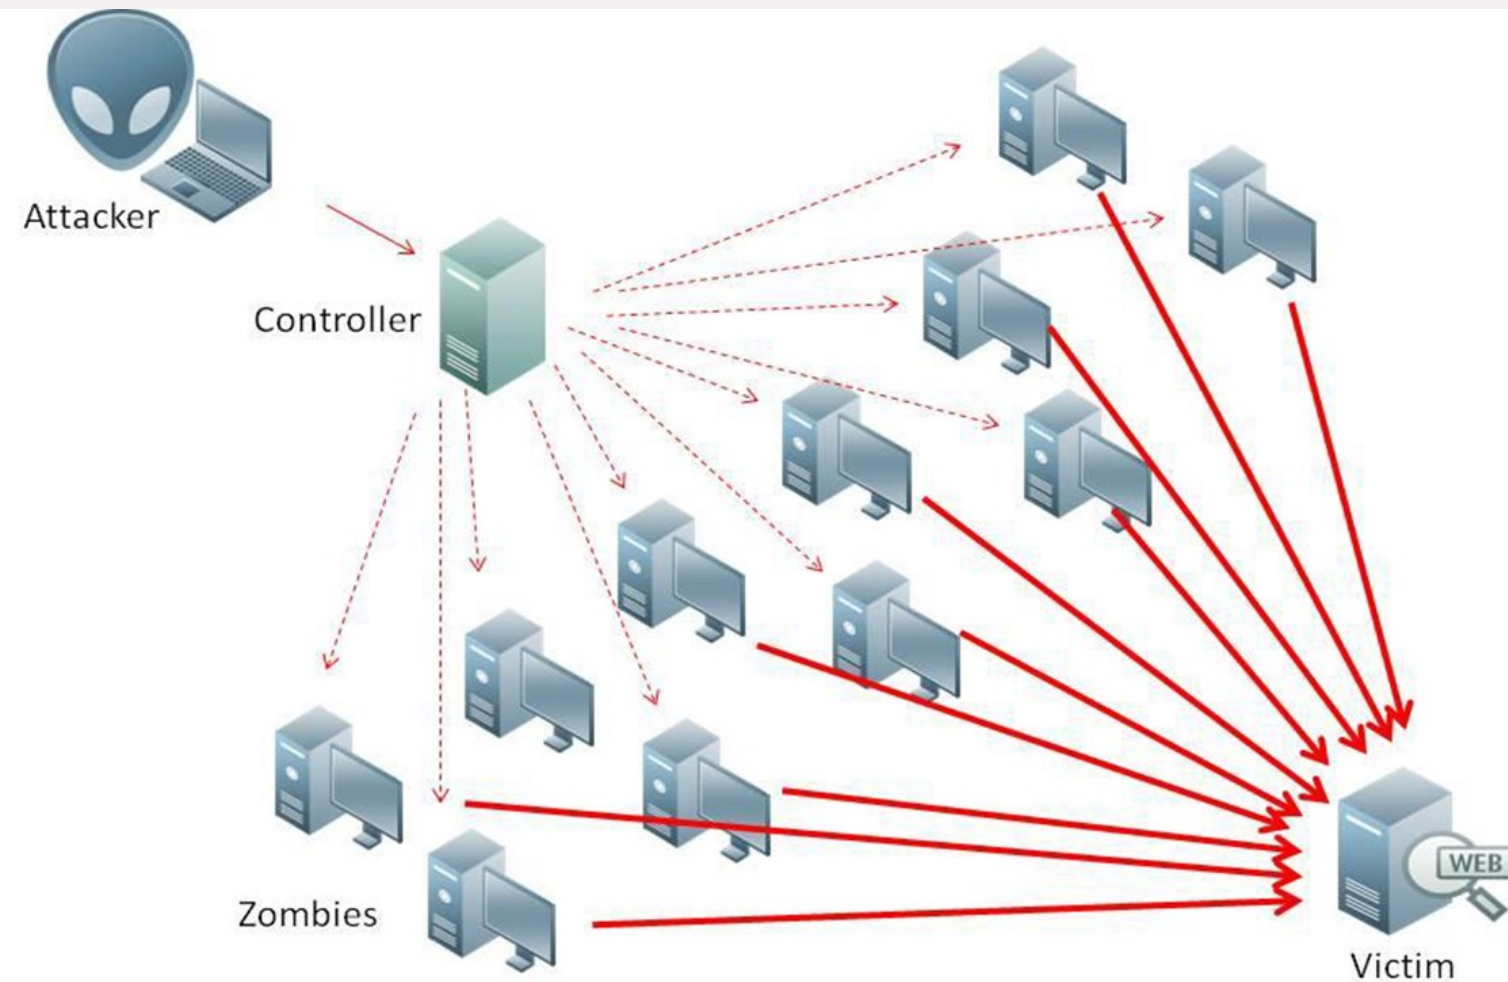

Availability

- Redundant Systems & Backups
- DDoS Protection & Network Security
- Disaster Recovery Plans
- Regular System Maintenance & Updates

Cyber Attack 1: Distributed Denial of Service (DDoS)

Overwhelms a Target with Excessive Traffic

Disrupts Services and Causes Downtime

Uses Botnets to Amplify Attacks

Mitigated by Firewalls and Traffic Filtering

Cyber Attack 2: Man-in-The-Middle (MiTM)

Intercepts Communication
Between Two Parties

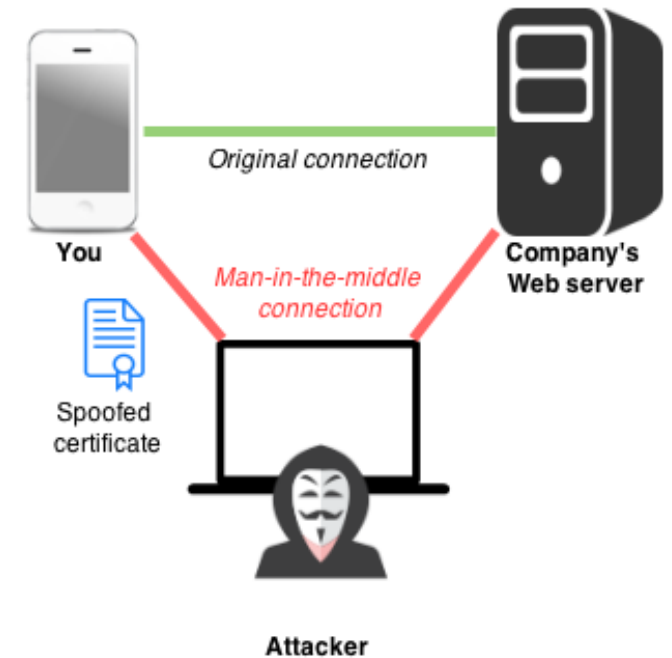

Can Be Used to Steal Sensitive
Information

Exploits Weak Encryption or
Unsecured Networks

Mitigated by HTTPS, VPNs, and
Strong Authentication

Thank You
