CAK2HAB3 - Dasar Kecerdasan Artifisial

Propositional Logic

S1 Informatika – Fakultas Informatika

Semester Genap 2024/2025

Propositional Logic

- *Logic* yang paling sederhana
 - Sangat mudah dipahami
 - Untuk masalah yang kompleks, *propositional logic* tidak bisa digunakan secara praktis
- 

Backus-Naur Form (BNF)

Sentence $\rightarrow$ *AtomicSentence* | *ComplexSentence*

AtomicSentence $\rightarrow$ *True* | *False*
| *P* | *Q* | *R* | ...

ComplexSentence $\rightarrow$ (*Sentence*)
| *Sentence* *Connective* *Sentence*
| $\neg$ *Sentence*

Connective $\rightarrow$ $\wedge$ | $\vee$ | $\Leftrightarrow$ | $\Rightarrow$

Backus-Naur Form (BNF)

Sentence $\rightarrow$ *AtomicSentence* | *ComplexSentence*

AtomicSentence $\rightarrow$ *True* | *False*
| *P* | *Q* | *R* | ...

ComplexSentence $\rightarrow$ (*Sentence*)
| *Sentence* *Connective* *Sentence*
| $\neg$ *Sentence*

Connective $\rightarrow$ $\wedge$ | $\vee$ | $\Leftrightarrow$ | $\Rightarrow$

Tabel Kebenaran 5 connective

P	Q	$\neg P$	$P \wedge Q$	$P \vee Q$	$P \Rightarrow Q$	$P \Leftrightarrow Q$
<i>False</i>	<i>False</i>	<i>True</i>	<i>False</i>	<i>False</i>	<i>True</i>	<i>True</i>
<i>False</i>	<i>True</i>	<i>True</i>	<i>False</i>	<i>True</i>	<i>True</i>	<i>False</i>
<i>True</i>	<i>False</i>	<i>False</i>	<i>False</i>	<i>True</i>	<i>False</i>	<i>False</i>
<i>True</i>	<i>True</i>	<i>False</i>	<i>True</i>	<i>True</i>	<i>True</i>	<i>True</i>

Tabel Kebenaran 5 connective

P	Q	$\neg P$	$P \wedge Q$	$P \vee Q$	$P \Rightarrow Q$	$P \Leftrightarrow Q$
<i>False</i>	<i>False</i>	<i>True</i>	<i>False</i>	<i>False</i>	<i>True</i>	<i>True</i>
<i>False</i>	<i>True</i>	<i>True</i>	<i>False</i>	<i>True</i>	<i>True</i>	<i>False</i>
<i>True</i>	<i>False</i>	<i>False</i>	<i>False</i>	<i>True</i>	<i>False</i>	<i>False</i>
<i>True</i>	<i>True</i>	<i>False</i>	<i>True</i>	<i>True</i>	<i>True</i>	<i>True</i>

CAK2HAB3 - Dasar Kecerdasan Artifisial

Inferensi pada Propositional Logic

S1 Informatika – Fakultas Informatika

Semester Genap 2024/2025

Aturan Inferensi pada Propositional logic

1. *Modus Ponens* atau *Implication-Elimination*:

$$\frac{\alpha \Rightarrow \beta, \alpha}{\beta}$$

2. *And-Elimination*:

$$\frac{\alpha_1 \wedge \alpha_2 \wedge \dots \wedge \alpha_n}{\alpha_i}$$

3. *And-Introduction*:

$$\frac{\alpha_1, \alpha_2, \dots, \alpha_n}{\alpha_1 \wedge \alpha_2 \wedge \dots \wedge \alpha_n}$$

4. *Or-Introduction*:

$$\frac{\alpha_i}{\alpha_1 \vee \alpha_2 \vee \dots \vee \alpha_n}$$

5. *Double-Negation-Elimination*:

$$\frac{\neg \neg \alpha}{\alpha}$$

6. *Unit Resolution*:

$$\frac{\alpha \vee \beta, \neg \beta}{\alpha}$$

7. *Resolution*:

$$\frac{\alpha \vee \beta, \neg \beta \vee \gamma}{\alpha \vee \gamma} \quad \text{ekivalen dengan} \quad \frac{\neg \alpha \Rightarrow \beta, \beta \Rightarrow \gamma}{\neg \alpha \Rightarrow \gamma}$$

1. *Modus Ponens (Implication-Elimination)*

$$\frac{\alpha \Rightarrow \beta, \quad \alpha}{\beta}$$

2. *And-Elimination*

$$\frac{\alpha_1 \wedge \alpha_2 \wedge \dots \wedge \alpha_n}{\alpha_i}$$

3. *And-Introduction*

$$\frac{\alpha_1, \alpha_2, \dots, \alpha_n}{\alpha_1 \wedge \alpha_2 \wedge \dots \wedge \alpha_n}$$

4. *Or-Introduction*

$$\alpha_i$$

$$\alpha_1 \vee \alpha_2 \vee \dots \vee \alpha_n$$

5. *Double-Negation-Elimination*

$$\frac{\neg\neg\alpha}{\alpha}$$

6. *Unit Resolution*

$$\frac{\alpha \vee \beta, \quad \neg \beta}{\alpha}$$

7. *Resolution*

$$\frac{\alpha \vee \beta, \quad \neg \beta \vee \gamma}{\alpha \vee \gamma}$$

$$\frac{\neg \alpha \Rightarrow \beta, \quad \beta \Rightarrow \gamma}{\neg \alpha \Rightarrow \gamma}$$

CAK2HAB3 - Dasar Kecerdasan Artifisial

Percept, Action, dan Goal

S1 Informatika – Fakultas Informatika

Semester Genap 2024/2025

Percept, Action, dan Goal

- **Percept:** sesuatu yang ditangkap oleh Agent
 - **Action:** aksi yang dapat dilakukan oleh Agent
 - **Goal:** tujuan
- 

Percept

- ▶ Percept : [stench , breeze, glitter, bump, scream]
 - Suatu percept yang bernilai [stench , breeze, None, None, None] bisa diartikan sebagai Ada stench dan breeze tetapi tidak ada glitter, bump, maupun scream
- 

Action

Move: hadap kiri, hadap kanan, atau maju.

Grab: mengambil objek yang berada di kotak dimana *Agent* berada.

Shoot: memanah lurus sesuai arah *Agent* menghadap.

Climb: memanjat keluar dari gua.

Goal

▶ Menemukan emas dan membawanya kembali ke kotak start (1,1) secepat mungkin dengan jumlah *action* yang semimumum mungkin, tanpa terbunuh.

Hadiah poin sebesar:

1.000 : jika *Agent* berhasil keluar gua dengan membawa emas

-1 : untuk setiap aksi yang dilakukan

-10.000 : jika *Agent* terbunuh

CAK2HAB3 - Dasar Kecerdasan Artifisial

Knowledge-based System

S1 Informatika – Fakultas Informatika

Semester Genap 2024/2025

Wumpus dengan Searching?

4	<i>Stench</i>		<i>Breeze</i>	<i>Pit</i>
3	<i>Wumpus</i> <i>Stench</i>	<i>Breeze,</i> <i>Stench ,</i> <i>Gold (glitter)</i>	<i>Pit</i>	<i>Breeze</i>
2	<i>Stench</i>		<i>Breeze</i>	
1	START <i>Agent</i> →	<i>Breeze</i>	<i>Pit</i>	<i>Breeze</i>
	1	2	3	4

Wumpus dengan Reasoning?

- Teknik *Reasoning* lebih mudah
 - Apakah bisa menggunakan *propositional logic*?
 - Pertama, kita harus merepresentasikan fakta atau keadaan ke dalam simbol-simbol *propositional logic*, misalnya:
 - $S_{1,2}$: ada *stench* di kotak (1,2)
 - $B_{2,1}$: ada *breeze* di kotak (2,1)
 - $G_{2,3}$: ada *glitter* di kotak (2,3)
 - $M_{1,4}$: *bump* di kotak (1,4)
 - $C_{1,3}$: ada *scream* di kotak (1,3)
 - $W_{1,3}$: ada *Wumpus* di kotak (1,3)
 - $\neg S_{1,1}$: tidak ada *stench* di posisi (1,1)
- 

Knowledge-based System

- Agent bisa dinyatakan sebagai knowledge-based system.
 - Agent melakukan aksi berdasarkan hasil penalaran percept terhadap *knowledge base* yang dimilikinya.
 - Pada awal permainan, di dalam *knowledge base* tidak ada fakta sama sekali karena Agent belum menerima percept.
 - *Knowledge base* hanya berisi beberapa aturan (rule) yang merupakan pengetahuan tentang environment.
- 

Pengetahuan tentang *Environment*

$$R_1 : \neg S_{1,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{1,2} \wedge \neg W_{2,1}$$

$$R_2 : \neg S_{2,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{2,1} \wedge \neg W_{2,2} \wedge \neg W_{3,1}$$

$$R_3 : \neg S_{1,2} \Rightarrow \neg W_{1,1} \wedge \neg W_{1,2} \wedge \neg W_{2,2} \wedge \neg W_{1,3}$$

$$R_4 : S_{1,2} \Rightarrow W_{1,3} \vee W_{1,2} \vee W_{2,2} \vee W_{1,1}$$

...

$$R_{33} : \neg B_{1,1} \Rightarrow \neg P_{1,1} \wedge \neg P_{1,2} \wedge \neg P_{2,1}$$

$$R_{34} : B_{2,1} \Rightarrow P_{1,1} \vee P_{2,1} \vee P_{2,2} \vee P_{3,1}$$

...

Translation

- Translasi digunakan untuk melakukan aksi yang tepat, *Agent* harus dibekali aturan untuk menerjemahkan pengetahuan menjadi aksi.
- T_1 dibaca: "Jika *Agent* di (2,1) dan menghadap ke Timur dan ada Pit di (3,1), maka jangan melangkah maju (menuju ke posisi (3,1))".

$$T_1 : A_{2,1} \wedge East_A \wedge P_{3,1} \Rightarrow \neg Forward$$

$$T_2 : A_{1,2} \wedge North_A \wedge W_{1,3} \Rightarrow \neg Forward$$

...

CAK2HAB3 - Dasar Kecerdasan Artifisial

Proses Reasoning

S1 Informatika – Fakultas Informatika

Semester Genap 2024/2025

4	<i>Stench</i>		<i>Breeze</i>	<i>Pit</i>
3	<i>Wumpus</i> <i>Stench</i>	<i>Breeze,</i> <i>Stench ,</i> <i>Gold (glitter)</i>	<i>Pit</i>	<i>Breeze</i>
2	<i>Stench</i>		<i>Breeze</i>	
1	START <i>Agent</i> →	<i>Breeze</i>	<i>Pit</i>	<i>Breeze</i>
	1	2	3	4

Apakah Wumpus berada di posisi (1,3)?
Bagaimana proses *reasoning* oleh *Agent*?

Knowledge Base Awal

$$R_1 : \neg S_{1,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{1,2} \wedge \neg W_{2,1}$$

$$R_2 : \neg S_{2,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{2,1} \wedge \neg W_{2,2} \wedge \neg W_{3,1}$$

...

$$R_{33} : \neg B_{1,1} \Rightarrow \neg P_{1,1} \wedge \neg P_{1,2} \wedge \neg P_{2,1}$$

$$R_{34} : B_{2,1} \Rightarrow P_{1,1} \vee P_{2,1} \vee P_{2,2} \vee P_{3,1}$$

...

$$T_1 : A_{2,1} \wedge \textit{East}_A \wedge P_{3,1} \Rightarrow \neg \textit{Forward}$$

$$T_2 : A_{1,2} \wedge \textit{North}_A \wedge W_{1,3} \Rightarrow \neg \textit{Forward}$$

Agent berada di posisi (1,1)

- Pada awalnya, KB hanya berisi Rule yang berupa pengetahuan tentang *environment*. Tidak ada fakta sama sekali karena Agent belum melakukan *percept*.
 - Pada kasus di atas, *Agent* menerima *percept* yang berupa *[None, None, None, None, None]*
 - Tidak ada *stench*, *breeze*, *glitter*, *bump* maupun *scream*
 - Selanjutnya, *Agent* menggunakan aturan inferensi dan pengetahuan tentang *environment* untuk melakukan proses inferensi.
- 

$$\neg S_{1,1} \quad \neg B_{1,1} \quad \neg G_{1,2} \quad \neg M_{1,1} \quad \neg C_{1,2}$$

$$R_1 : \neg S_{1,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{1,2} \wedge \neg W_{2,1}$$

$$R_2 : \neg S_{2,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{2,1} \wedge \neg W_{2,2} \wedge \neg W_{3,1}$$

...

$$R_{33} : \neg B_{1,1} \Rightarrow \neg P_{1,1} \wedge \neg P_{1,2} \wedge \neg P_{2,1}$$

$$R_{34} : B_{2,1} \Rightarrow P_{1,1} \vee P_{2,1} \vee P_{2,2} \vee P_{3,1}$$

...

$$T_1 : A_{2,1} \wedge \textit{East}_A \wedge P_{3,1} \Rightarrow \neg \textit{Forward}$$

$$T_2 : A_{1,2} \wedge \textit{North}_A \wedge W_{1,3} \Rightarrow \neg \textit{Forward}$$

Proses inferensi di posisi (1,1)

- *Modus Ponens* untuk $\neg S_{1,1}$ dan R_1 sehingga dihasilkan:
$$\neg W_{1,1} \wedge \neg W_{1,2} \wedge \neg W_{2,1}$$
- *And-Elimination* terhadap hasil di atas sehingga diperoleh:
$$\neg W_{1,1} \quad \neg W_{1,2} \quad \neg W_{2,1}$$
- *Modus Ponens* untuk $\neg B_{1,1}$ dan R_{33} sehingga dihasilkan:
$$\neg P_{1,1} \wedge \neg P_{1,2} \wedge \neg P_{2,1}$$
- *And-Elimination* terhadap hasil di atas sehingga diperoleh:
$$\neg P_{1,1} \quad \neg P_{1,2} \quad \neg P_{2,1}$$

$$\begin{array}{ccccccc}
\neg S_{1,1} & \neg B_{1,1} & \neg G_{1,2} & \neg M_{1,1} & \neg C_{1,2} & \neg \mathbf{W}_{1,1} & \neg \mathbf{P}_{1,1} \\
& & & & & \neg \mathbf{W}_{2,1} & \neg \mathbf{P}_{2,1} \\
& & & & & \neg \mathbf{W}_{1,2} & \neg \mathbf{P}_{1,2}
\end{array}$$

$$R_1 : \neg S_{1,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{1,2} \wedge \neg W_{2,1}$$

$$R_2 : \neg S_{2,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{2,1} \wedge \neg W_{2,2} \wedge \neg W_{3,1}$$

...

$$R_{33} : \neg B_{1,1} \Rightarrow \neg P_{1,1} \wedge \neg P_{1,2} \wedge \neg P_{2,1}$$

$$R_{34} : B_{2,1} \Rightarrow P_{1,1} \vee P_{2,1} \vee P_{2,2} \vee P_{3,1}$$

...

$$T_1 : A_{2,1} \wedge \textit{East}_A \wedge P_{3,1} \Rightarrow \neg \textit{Forward}$$

$$T_2 : A_{1,2} \wedge \textit{North}_A \wedge W_{1,3} \Rightarrow \neg \textit{Forward}$$

Agent bergerak ke posisi (2,1)

- 
- *Percept: [None, Breeze, None, None, None]*
 - *Ada breeze*
 - *Tidak ada stench, glitter, bump maupun scream*
 - $\neg S_{2,1}$, $B_{2,1}$, $\neg G_{2,1}$, $\neg M_{2,1}$, dan $\neg C_{2,1}$

Proses inferensi di (2,1)

- *Modus Ponens* untuk $\neg S_{2,1}$ dan R_2 sehingga dihasilkan:
 $\neg W1,1 \wedge \neg W2,1 \wedge \neg W2,2 \wedge \neg W3,1$
- *And-Elimination* terhadap hasil tersebut sehingga dihasilkan:
 $\neg W1,1 \quad \neg W2,1 \quad \neg W2,2 \quad \neg W3,1$
- *Modus Ponens* untuk $B_{2,1}$ dan R_{34} sehingga dihasilkan:
 $P1,1 \vee P2,1 \vee P2,2 \vee P3,1$
- *Unit Resolution* terhadap hasil tersebut dengan $\neg P_{1,1}$ kemudian $\neg P_{2,1}$, sehingga dihasilkan kalimat baru:
 $P2,2 \vee P3,1$

$$\begin{array}{cccccccc}
\neg S_{1,1} & \neg B_{1,1} & \neg G_{1,2} & \neg M_{1,1} & \neg C_{1,2} & \neg W_{1,1} & \neg P_{1,1} & \mathbf{P_{2,2} \vee P_{3,1}} \\
& & & & & \neg W_{2,1} & \neg P_{2,1} & \\
& & & & & \neg W_{1,2} & \neg P_{1,2} & \\
& & & & & \neg \mathbf{W_{2,2}} & & \\
& & & & & \neg \mathbf{W_{3,1}} & &
\end{array}$$

$$R_1 : \neg S_{1,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{1,2} \wedge \neg W_{2,1}$$

$$R_2 : \neg S_{2,1} \Rightarrow \neg W_{1,1} \wedge \neg W_{2,1} \wedge \neg W_{2,2} \wedge \neg W_{3,1}$$

...

$$R_{33} : \neg B_{1,1} \Rightarrow \neg P_{1,1} \wedge \neg P_{1,2} \wedge \neg P_{2,1}$$

$$R_{34} : B_{2,1} \Rightarrow P_{1,1} \vee P_{2,1} \vee P_{2,2} \vee P_{3,1}$$

...

$$T_1 : A_{2,1} \wedge \textit{East}_A \wedge P_{3,1} \Rightarrow \neg \textit{Forward}$$

$$T_2 : A_{1,2} \wedge \textit{North}_A \wedge W_{1,3} \Rightarrow \neg \textit{Forward}$$

Agent bergerak ke posisi (1,2)

- 
- *Percept*: [*Stench*, *None*, *None*, *None*, *None*]
 - Ada *stench*
 - Tidak ada *breeze*, *glitter*, *bump* maupun *scream*
 - $S_{1,2}$, $\neg B_{1,2}$, $\neg G_{1,2}$, $\neg M_{1,2}$, dan $\neg C_{1,2}$

Proses inferensi di (1,2)

- **Modus Ponens** untuk $S_{1,2}$ dan R_4 sehingga dihasilkan:
 $W_{1,3} \vee W_{1,2} \vee W_{2,2} \vee W_{1,1}$
- **Unit Resolution** terhadap hasil di atas dengan $\neg W_{1,1}$ sehingga dihasilkan:
 $W_{1,3} \vee W_{1,2} \vee W_{2,2}$
- **Unit Resolution** terhadap hasil di atas dengan $\neg W_{2,2}$ sehingga dihasilkan:
 $W_{1,3} \vee W_{1,2}$
- **Unit Resolution** terhadap hasil di atas dengan $\neg W_{1,2}$ sehingga dihasilkan:
 $W_{1,3}$

Terima Kasih
